DETAILED ACTION

Reasons for Allowance

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 13 and 23 have been carefully considered. Prior art of record fails to teach the combination of claimed elements including a method of displaying a view page at a client site; the view page having a link to a plug-in wherein the link points to a filler page on a server, the filler page having a list of data that has a plurality of data tuples; the data tuples having a plurality of attributes; the tuples being displayed in horizontal rows and the attributes being displayed in vertical columns; downloading the filler page using the plug-in and then rendering the list data at the client site. Prior art or record fails to teach dynamically manipulating a web page by downloading a filler page specifying list data or data tuples, which include a plurality of attributes, and by manipulating the list content.

Bernardo et al (US 6,684,369 B1) discloses a software tool for simplifying the creation of Web sites using templates that enable users to personalize the Web site and pages. Bernardo fails to teach or suggest a view page having a plug-in that enables downloading a filler page, and rendering of a list content according to the content structure specified by the filler page, and a list data provided by the filler

page, wherein the list data has a plurality of data tuples and attributes displayed in horizontal rows and vertical rows, respectively.

Rasmussen et al (US 20020178187 A1) discloses a system for applying electronic signatures to HTML forms, the form being a web page or template containing blank fields into which data can be entered. The user is enabled to select an HTML form to be filled and signed, and click on a link in the web page to initiate a download of the selected form. The link defining the second page is specified in a plugin's tag attribute. Rasmussen fails to teach or suggest downloading a filler page providing a list data having a plurality of tuples being displayed in horizontal rows and a plurality of attributes being displayed in vertical columns.

Conclusion

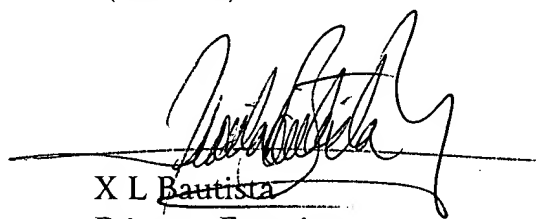

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
